Designer
HDR Inc., Bellevue, WA

Background

The project will reduce overflows of combined sewage (rainfall runoff + sewage) into Lake Washington. Overflows typically occur during large storm events when flows exceed the collection system's capacity.

Project Scope

Seattle Public Utilities (SPU) Henderson North CSO Reduction Project will construct buried storage facilities to reduce combined sewage overflows in southwest Seattle. Key project components include:

- 2.65 million gallon combined sewer storage tank in Seward Park
- Shoreline habitat enhancement
- 24-inch outfall replacement in Lake Washington
- 16,000 gallon storage pipe in 57th Ave S

Contracting Opportunities

GCCM Contractor Selected – Hoffman Construction

Schedule of Events	Target Date
Advertising/Bidding/Award of Bid Packages	Late Summer – Fall 2014
Construction	January 2015 – January 2017
